| <b>IVR Development Internship</b><br><i>Xtend Technologies, Kochi</i>                                                                                                                                                                                                                                                        | May 2025 – Jun 2025 |
| <ul style="list-style-type: none"><li>Developed IVR scripts using the IVR Developer Tool Kit for real-world applications.</li><li>Worked on systems such as doctor appointment booking and hotel booking solutions.</li><li>Gained hands-on exposure to IVR solution deployment, maintenance, and workflow design.</li></ul> |                     |

## Projects

---

### Facial Emotion Recognition System

- Built a real-time facial emotion recognition system using TensorFlow CNN and OpenCV.
- A group project focused on recognising emotions from facial expressions using deep learning techniques by building a CNN model. The system identifies emotions in real-time using webcam and extracts facial information using MediaPipe. My role in this project focused on the data pipeline and preprocessing both the training data and also the input from the live camera feed.

### Hotel Booking System with IVR Integration

- Developed an automated hotel booking solution using IVR scripting.
- Implemented features for booking, status inquiry, and cancellation.
- Integrated the system with a MySQL database for real-time data handling.

### Explainable AI for Brain Tumor Detection from MRI Scans

- Developed a MRI tumor detection system which classifies the input MRI into tumor types using TensorFlow model as well as shows a heatmap of region responsible for the model output using GradCAM.

### Employee Management System

- Developed a Java Swing-based desktop application with MySQL backend.
- Implemented full CRUD operations for employee records.
- Ensured reliable data persistence and smooth UI-database interaction.

## Certifications

---

- IBM – Getting Started with Git and GitHub (Coursera)
- IBM – Introduction to HTML, CSS, and JavaScript (Coursera)
- NPTEL – Fundamental Algorithm: Design and Analysis
- NPTEL Elite – Artificial Intelligence: Search Methods for problem solving
- NPTEL Elite Gold – User-Centric Computing for HCI

Technical Knowledge : Java with foundational understanding of Object-Oriented Programming (OOPS), Database Management Systems (DBMS), and SQL.
